OFFER E-NEWS

January 2015

OFFER E-NEWS is a free monthly newsletter providing information on upcoming education meetings, conferences, and other ME/CFS & FM events or programs that may be of interest. It also includes links to what's new on the OFFER website, help in managing symptoms, information about local researchers looking for participants, and current articles in the news.

OFFER Education Meeting

"Panel of the Parents of ME/CFS and Fibromyalgia Patients"

Panel

Wednesday, January 7, 2015 at 7:00 p.m.

Location:

Salt Lake County Complex, North Building, 2001 S. State Street,
SLC, UT

Park in the northeast corner of the complex.

New Fatigue Consultation Clinic Patient Study

Fatigue Consultation Clinic is conducting a **non-drug** approach for **fibromyalgia** currently being evaluated as part of a new clinical research study. NeuroPoint delivers gentle electrical stimulation to specific areas of the brain that may be involved in overactive pain perception for fibromyalgia sufferers. This stimulation is designed to reduce this over activity in a way that might help reduce the perception of pain. To be eligible for the NeuroPoint Clinical study, you must meet specific criteria.

If you're interested or want to learn more, contact the research department at 801-532-8311. Call soon, available space is limited.

The Shauna Bateman Horne

Clinic

Planting Seeds of Hope for ME/CFS and FM

The Organization for Fatigue & Fibromyalgia Education & Research (OFFER) Letter of Intent:

Right now, in the state of Utah alone, there are thousands of people with Chronic Fatigue Syndrome (also called Myalgic Encephalomyelitis or ME/CFS) and Fibromyalgia (FM) who have not been properly diagnosed or offered effective treatments. Unfortunately, many are disabled by their illness. An important reason for the lack of accurate and timely diagnosis and effective treatment is clearly stated on the U.S. Centers for Disease Control and Prevention (CDC) website: "Researchers have not yet identified what causes CFS, and there are no tests to diagnose CFS." "Despite a vigorous search, scientists have not yet identified what causes CFS." ... To read the full letter, please go to <http://www.offerutah.org/sbhcenterofexcellence.html>.

Watch Dr. Lucinda Bateman's initial announcement that OFFER has set the goal of creating a new clinical and research Center of Excellence. The Shauna Bateman Home Clinic for ME/CFS & FM at: <http://offerutah.org/bateman5.17.htm>.

Current Patient Studies

New Research Studies

University of Utah is recruiting females with Fibromyalgia and healthy volunteers for sleep and pain sensitivity study

Researchers in the Department of Anesthesiology are conducting an IRB approved study for females 21-65 years of age that have Fibromyalgia and do not exercise regularly (less than 30 minutes per week). We are also recruiting healthy volunteers that do not have chronic pain and do not exercise regularly. The purpose of this research project is to examine if sleep is related to thermal and ischemic pain sensitivity and cellular aging in women with Fibromyalgia compared to healthy volunteers. After an initial visit, you will monitor your sleep using a wrist watch for seven days then return for a single testing visit where we will evaluate two different methods to test pain tolerance and threshold. **There will be compensation for your time and participation.**

For more information please contact the study coordinator at (801) 581-4232 or e-mail painresearchstudies@hsc.utah.edu
Go to: <http://healthsciences.utah.edu/pain-research-center/studies/pain-and-sleep-study.php>.

The Synergy Trial

A Clinical Trial Investigating a Combination of a CFS Nutrient Formula plus a Currently Available Medication to Treat *Chronic Fatigue Syndrome*

The Fatigue Consultation Clinic is one of four clinics nationally that are participating in this study.

Fatigue Consultation Clinic

Dr. Bateman's Research Team continues to seek research participants. They are currently enrolling in:

- **The Synergy Trial**
- Three drug studies for adolescents with FM
- One drug study for adults with FM
- A number of biomarker studies for patients with CFS.

Volunteer

OFFER is always looking for individuals willing to help accomplish our mission statement: to educate, advocate and help fund promising research. OFFER is a volunteer organization and almost all of us deal with ME/CFS and/or Fibromyalgia on a daily basis. We understand limitations! Many of these jobs can be done from home, using a personal computer with an internet connection. If you have skills you'd like to share, please let us know.

These are some areas where we currently need volunteers:

1. Help with our web presence. Experienced or willing to learn.

- Adobe Flash
- Adobe Dreamweaver
- HTML
- Social Media, including Facebook, YouTube, Google+

2. A/V experience. OFFER has the equipment.

- Filming
- Editing

3. Patients, caregivers and clinicians who would be willing to tell their story on video for 10-15 minute segments.

If you would like to volunteer in any of these areas, please go to: <http://www.offerutah.org/volunteer.html>.
